June 18, 2018	6:00-6:30 P.M.	Work Session - Airport Maintenance Hangar	City Hall Annex-Conference Room
June 18, 2018	6:30-7:00 PM	Work Session - Lakeshore Landing	City Hall Annex-Conference Room
June 18, 2018	7:00 P.M.	City Council Meeting	City Hall Annex-Council Chambers

City Manager

I participated Thursday in a presentation by Dr. Richard Jackson. From his UCLA Bio:

Dr. Richard Jackson is a Professor at the Fielding School of Public Health at the University of California, Los Angeles. A pediatrician, he has served in many leadership positions in both environmental health and infectious disease with the California Health Department, including the highest as the State Health Officer. For nine years he was Director of the CDC's National Center for Environmental Health in Atlanta and received the Presidential Distinguished Service award. In October 2011, he was elected to the Institute of Medicine of the National Academy of Sciences.

Dr. Jackson shared his insights on the importance of the built environment on community health. He was impressed with the steps we have been taking as a community. Council will soon be discussing the Streets for All People policy once again. Several months back it came in front of Council, but Council opted to wait for the County to act first. The County recently adopted the policy so it is now back to the City.

Airport

On the Airport's behalf, Hunter Communications is installing fiber to the Terminal Building and the Fixed Base Operation's (Century Aviation) hangar for their use. As a result of this project, fiber is also available for use by the 173rd Fighter Wing's operation if and when there is a need.

Please see the attached press release from the United States Congress entitled Merkley, Wyden, Walden Introduce Bill to Support Rural Air Service, Armed Forces.

Support Services

Technology Services: Construction is wrapping up on the City's Wireless Surveillance Project. The Maintenance Department installed 2 30' poles at the Center Reservoir and the Maintenance Department used its new trencher to dig trenches from the poles to the control room. Maintenance worked with Will from Technology Services to install conduit, electrical boxes, and run wiring to and from each of the poles back to the control room. Will installed 4 cameras (2 on each pole), a DVR, and the last air Fiber antenna on top of the East Tank to connect the site to the City's new wireless network. Final steps of the project will involve installing the server and network infrastructure at the PD. Special thanks to the Maintenance and Parks Departments for all their hard work and dedication to this project. We couldn't have done it without them.

Development Services

North Eldorado Street Project - Crews are continuing to work on the left side of Eldorado between Lexington and Birch this week and next week. The curb and sidewalk at Lowell will be poured in the upcoming days. Water meters from Lexington to Birch are being relocated on the left side. We are working with utility companies to get pedestals relocated or adjusted and hope to have that work completed within the next couple of weeks. Traffic control – The lanes have been narrowed and shifted throughout project limits for traffic control. Local traffic and residents should expect congestion through the work zones.

Microsurfacing: Micro surfacing should be completed Monday, June 11th. Crews have been onsite this week installing new sign bases. The work on the intersection of

Oregon/Upham/Prospect was completed earlier this week. Travelers should expect lane closures, narrowed lanes and detours through June 20th as micro surfacing is completed and striping takes place. Please see the attached map depicting the micro surfacing areas.
